Summary

Backend Software Engineer with hands-on experience building production-grade REST APIs using Spring Boot, Spring Security 6, and Node.js. Designed and shipped a live AI-powered backend covering JWT authentication, database schema design with Flyway migrations, and third-party API integration. Comfortable across the full backend stack: API design, authentication, SQL/NoSQL databases, Docker, and CI/CD.

Technical Skills

Languages: Java, TypeScript, JavaScript

Backend Frameworks: Spring Boot, Spring Security 6, Hibernate (JPA), Node.js, Express.js

Databases: PostgreSQL, MongoDB

Cloud & DevOps: Docker, GitHub Actions (CI/CD), Neon PostgreSQL (cloud)

Tools: Git, GitHub, Maven, Flyway, Swagger/OpenAPI 3.0, Postman, Linux

Testing: Postman (automated test suites), JUnit (unit testing)

Concepts: REST API Design, JWT / RBAC / OAuth flows, Clean Architecture, OOP, Data Structures & Algorithms, System Design (fundamentals)

Experience

OctaNet Services Pvt. Ltd.

July 2024 – November 2024

Software Engineer Intern

Remote

- Developed and shipped RESTful API endpoints in Node.js/Express.js supporting core product features, with `express-validator` input validation and structured error handling on every route.
- Implemented JWT-based user authentication with bcrypt password hashing; designed and ran Postman test scenarios covering edge cases including invalid tokens, expired sessions, and concurrent logins.
- Added compound indexes to MongoDB document schemas, reducing average query response time by 35% and lowering read load across high-traffic endpoints.

Projects

MockMate – AI-Powered Career Coaching Backend | *Java, Spring Boot, PostgreSQL, Flyway, Clerk* [GitHub](#)

- Built 10+ Microservices following Clean Architecture with modular layers (controllers, services, repositories, DTOs, mappers), keeping each layer independently testable and loosely coupled.
- Implemented stateless JWT authentication using Clerk-issued tokens, a custom `JwtAuthFilter`, and JWKS-based key rotation integrated into the Spring Security 6 filter chain, securing all protected routes.
- Integrated Google Gemini API with structured prompt engineering to deliver four AI features: ATS resume scoring, cover letter generation, mock interview Q&A with feedback, and weekly industry trend summaries.
- Standardized API responses using a generic `ApiResponse<T>` wrapper and a global `@ControllerAdvice` exception handler, consolidating error handling across all endpoints into a single layer.
- Managed schema evolution across six relational tables using Flyway versioned migrations, maintaining deployment compatibility on a Neon PostgreSQL cloud instance with zero downtime.
- Documented all API contracts via Swagger/OpenAPI 3.0 with endpoint descriptions, request/response schemas, and a Postman collection for manual and automated testing.

EduTrack – Facial Recognition Attendance System | *Node.js, Express.js, MongoDB, MTCNN, Docker* [GitHub](#)

- Built the Node.js/Express.js backend for an ML-powered attendance system; connected MTCNN and FaceNet inference pipelines via REST, achieving 82% face recognition accuracy and sub-500ms API response times under live load.
- Designed a three-tier RBAC system (Admin, Faculty, Student) with fine-grained permission checks on all protected routes; reduced manual attendance recording time for a 60-student cohort by approximately 80%.
- Secured all authentication routes with stateless JWT and bcrypt password hashing; wrote Postman automated test suites covering invalid tokens, expired sessions, and concurrent login attempts.

BookNest – Full-Stack E-Commerce Bookstore | *Node.js, Express.js, React.js, MongoDB, Firebase, Docker* [GitHub](#)

- Developed modular RESTful APIs in Express.js covering user management, product catalog, and order processing with role-based storefront access and end-to-end cart-to-checkout workflows.
- Integrated Firebase Authentication with bcrypt-encrypted sessions and added structured logging to track API response times and error rates.

Education

Sri Balaji College of Engineering & Technology

B.Tech in Computer Science — CGPA: 8.3/10

2021 – 2025

Jaipur, Rajasthan
